

An Even Better Choice...

HPV Type-Detect® 2.0 by Bio-Plex Analysis

Liquid DNA bead-based technology

Simple & Convenient

Classification of HPV types

**The only test
that offers type specific detection of
19 HPV subtypes in a single vial**

- Differentiates between 14 HR and 5 LR HPVs
- Determines patient's specific HPV type(s)
- Detects multiple infections
 - No interfering substances
 - Detects newly acquired HPV infections
 - No cross-reaction with other HPV types
 - Detects as few as 10 copies per reaction
