

Helping You Meet the Diverse Needs of Your Residents...

MDL, a leader in Family Practice and Women's Health testing, can empower your organization to better understand the unique healthcare needs of your facilities residents and improve provider and patient access to advanced diagnostic testing.

- Experience collaborating with Long Term Healthcare Facility teams
- Customized service agreements
- Competitive pricing and indigent patient protocols
- We file Medicare and Medicaid
- Compliant with state and local health department reporting mandates
- Receive quarterly client newsletters with account-specific data
- Reduce healthcare costs by tailoring treatment for each patient, reducing the need for repeat office visits

Diagnostic Advantages...

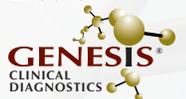

- One vial, multiple pathogens
- DNA amplification via PCR technology
- Microbial drug resistance profiling
- High precision robotic accuracy
- High diagnostic sensitivity & specificity
- Specimen viability up to 5 days after collection
- Test additions available up to 30 days after collection
- No refrigeration required before or after collection
- Blood and excess mucus will not affect results

A DIVISION OF

IH0300 Rel: 2/2025

Bringing you the latest advances in molecular diagnostic testing...

OneSwab®

One vial...over 90 pathogens

- Cervicovaginal collection in females.
- Wound and lesion sampling for males and females.

Vaginitis & Vaginosis

- Bacterial Vaginosis Panel with Lactobacillus Profiling
- Candida Vaginitis Panel with Fluconazole resistance
- Aerobic Vaginitis Panel
- Ureaplasma & Mycoplasma Panel

Sexually Transmitted Infections

- Leukorrhea Panel with antimicrobial resistance
- Genital Ulcer Panel
- HPV type detect

Skin & Soft Tissue Infections

- SSTI testing by PCR including MRSA and CA-MRSA
- Antibiotic resistance testing
- *Candidozyma auris*

Intestinal Pathogens

- Intestinal pathogen detection on loose stool or rectal swabs.

UroSwab®

Simple, Convenient & Noninvasive
One vial...over 40 pathogens

- Urine collection for both males and females.

Urinary Tract Infections

- Urinary Tract Infection (UTI) testing
- Antibiotic resistance testing
- Urogenital Candidiasis Panel
- Urogenital Mycoplasma and Ureaplasma Panel

Sexually Transmitted Infections

- Leukorrhea Panel with antimicrobial resistance with antibiotic resistance testing at no additional charge.
- *Mycoplasma genitalium* with antibiotic resistance testing

NasoSwab®

Simple & Convenient
One vial...over 40 pathogens

- Flocked swab anatomically engineered to contour to the mid-turbinate area.
- Less invasive than traditional nasal lavage.

Respiratory Tract Infections

- COVID-19 testing by PCR
- *Bordetella pertussis* with rapid 24 - 72 hour turnaround time
- RSV A & RSV B
- Influenza A & Influenza B
- Adenovirus
- Parainfluenza 1-4
- MRSA and Community-acquired MRSA
